

BE CROCWISE IN CROC COUNTRY

Estuarine and freshwater crocodiles are an important part of north and central Queensland's wetlands, freshwater and marine areas. They are often the largest predator in these areas and help to maintain the overall health and balance of these ecosystems.

Estuarine crocodiles live mainly in tidal reaches of rivers, as well as in freshwater lagoons, swamps and waterways up to hundreds of kilometres from the sea. They can even occur along some beaches and around offshore islands. Estuarine crocodiles can be active at anytime.

You are responsible for your own safety, so please follow these guidelines and be crocwise in croc country.

- Obey crocodile signs—they are there for your own protection.
- Never swim in water where crocodiles may live, even if there is no warning sign present.
- When fishing, always stand a few metres back from the water's edge and never stand on logs or branches overhanging the water.
- Never clean fish or discard fish scraps near the water's edge or at boat ramps.
- Stay well back from any crocodile slide marks. Crocodiles may still be close and may approach people and boats.
- Keep your arms or legs inside of the boat when fishing.
- Never provoke, harass or interfere with crocodiles—even small ones.

Further information visit the Queensland Government website www.qld.gov.au

- Never feed crocodiles—it is illegal and dangerous.
- Never leave food scraps at your campsite. Always check that previous campers haven't left any food scraps.
- Never prepare food, wash dishes or pursue any other activities near the water's edge or adjacent sloping banks.
- Be more aware of crocodiles during the breeding season—September to April.

When it comes to crocodiles, there's always more than meets the **eye**.
