11. Appendix B – How to interpret this report

% Positive, Neutral and Negative Scores

Across all Working for Queensland (WfQ) reporting, data is expressed as % positive, % neutral or % negative.

- % positive presents the proportion of respondents who expressed a positive opinion or assessment i.e. combining 'Strongly agree' and 'Agree' responses.
- % neutral presents the proportion of respondents who expressed a neutral opinion or assessment.
- % negative presents the proportion of respondents who expressed a negative opinion or assessment i.e. combining 'Strongly disagree' and 'Disagree' responses.

Negatively Worded Questions: An example

What are negatively worded questions?

Negatively worded questions are items in the questionnaire that are phrased in a negative way e.g. "Approval processes at my work are excessive".

How are the negatively worded responses scored?

When responding to a negatively worded question, "Strongly disagree" and "Disagree" responses are classified as positive i.e. it is good that you disagree that approval processes at work are excessive (this means they are not excessive!). Therefore, the "Strongly disagree" and "Disagree" responses are combined to calculate the % positive score.

What does this mean for interpreting the % positive score for negatively worded questions?

The % positive combines the negative responses as they are the "preferred" responses to this item.

EXAMPLE

In the table below the % positive score for "Approval processes at my work are excessive" is 82%. This result can be expressed by stating that:

82% disagreed that their "Approval processes at my work are excessive"

OR

82% felt that the approval processes at their work are not excessive.

Conversely, the % negative score means that 8% of the employees perceive that the approval processes at their work are excessive.

	% Positive	vs 2014	% Neutral	vs 2014	% Negative	vs 2014
Q23 h Approval processes at my work are excessive.	82%	+4	10%	-2	8%	-5

How will I know if I am interpreting this correctly?

To assist in the interpretation, all negatively worded questions are accompanied by an explanatory statement.

11. Appendix B – How to interpret this report

Rounding

Results were rounded to whole numbers. Percentages may therefore not add up to 100%.

Factor Scores

Factor measures combine information from multiple survey items that correlate highly with the overall factor. The factor scores are calculated as the sum of positive responses given to all questions within the factor, divided by the number of answers to all questions within the factor.

The report depicts 3 workplace outcomes and makes use of 16 factor measures that are documented in Appendix A.

% Change and Division Comparisons

Throughout this report the % change figure and division comparisons are frequently reported. The % change score relates to differences between:

- the 2014 and 2015 % positive, negative and neutral scores, or
- the 2015 agency and Qld Public Sector % scores.

The % score is highlighted green when the 2015 work area result is five or more percentage points higher than the 2014 score. The % score is highlighted red where the 2015 work area result is five or more percentage points lower.

The division comparisons relate to the comparisons of the % positive scores between the agency and other divisions.

Quintile

Indicates the position of your agency when the 54 participating agencies are ranked against individual workplace factors and workplace outcomes.

Quintile	Interpretation
1	Among first 20% of agencies OR Among top eleven ranked agencies
2	Among second 20% of agencies OR Between 12th and 22nd ranked agencies
3	Among third 20% of agencies OR Between 23rd and 33rd ranked agencies
4	Among fourth 20% of agencies OR Between 34th and 44th ranked agencies
5	Among last 20% of agencies OR Between 45th and 54th ranked agencies

Quintile positions 1 and 2 are indicated in green font, the third quintile is indicated in yellow font, and quintile positions 4 and 5 are indicated in red font.

PLEASE NOTE: While the coloured highlighting of both the % scores and the quintiles helps differentiate results, it does not necessarily indicate a statistically significant difference.

Number of Respondents

The number of respondents for sub populations (i.e. divisions, demographic groups) may not add up to the total number of respondents due to missing demographic or division information.

Definitions

The following definitions were used in the survey:

Your workgroup - The group or team where you spend most of your time. If you are a manager your workgroup is the people you manage.

Your workplace - The place where you work, such as a school, hospital or office location as well as the places you visit as part of your work. Questions about your workplace concern the experiences you have in this environment.

Your organisation

For Health agencies - The Hospital and Health Service (HHS), Commercial Business Unit or Division in which you work.
For non-Health agencies - The Government department or public service office you work for in your current job (e.g. Department of Transport and Main Roads for staff employed in RoadTek, Public Trust Office for staff working for the Public Trust Office).

Your manager - The person you usually report to.

Your senior manager - The person your manager usually reports to.

Your customer(s) - The person(s) you provide advice or service to, whether internal or external to the Queensland Public Sector (e.g. students, clients, customers, stakeholders, patients, members of the community).

Workplace harassment - entails offensive, belittling or threatening behaviour at an individual or group. The behaviour is unwelcome, unsolicited, usually unreciprocated.

Workplace bullying - Workplace bullying is repeated and unreasonable behaviour directed towards a worker or a group of workers that creates a risk to health and safety.

Key Drivers

Key drivers identify which of the workplace factors shown in the diagram featured on this page had the greatest statistical impact on each of the three workplace outcomes. In the body of the report they are ordered by strength of impact (i.e. strongest listed first). The diagram featured on this page outlines the conceptual model behind the analysis.
