*Note: AO earnings groups are based upon the AO salary scale within the State Government Departments Certified Agreement. This agreement has been selected because it has coverage of approximately 50,000 employees distributed across most agencies. The quantum of increases and the relevant dates of payment for this agreement may differ from other certified agreements whose coverage also includes large groups of employees, such as teachers, teacher aides, nurses, health professionals and police officers. These differences may cause volatility of distribution between the salary levels depending upon the date of data capture.*

## General Comments

- The information contained in this report is derived from data provided by public service agencies as part of the Government approved Minimum Obligatory Human Resource Information (MOHRI) process and is a snapshot of the workforce as at the June 2014 quarter.
- Data is validated at the agency level via the Workforce Analysis and Collection Application (WACA). The WACA is a national database used by five state jurisdictions to validate and store information about each jurisdiction's workforce.
- Employee numbers published by individual agencies may vary from those in this report due to differing dates of data capture and definitional issues relating to employee status.
- Agencies are individually responsible for providing the Public Service Commission with accurate and quality data in terms of the MOHRI system.
- Employees on extended unpaid leave of greater than eight weeks and employment agency staff have been excluded.
- The figures stated in this report are subject to revision and further validation by departments and agencies.
- Data for government department and public service offices are included in the MOHRI dataset for the "Queensland Public Service". Statutory bodies are gradually being added to the Queensland Public Service MOHRI dataset as their data becomes available. Government Owned Corporations are not included in the MOHRI collection of public service workforce data.
- Some calculations, including per annum salary and earnings are drawn from one pay period in a quarter and extrapolated over a year. Occasionally, payroll variations might occur in some agencies in the nominated pay period, resulting in perceived variations to the per annum figures.
- Due to rounding, some percentages in figures may not add up to 100%.

| Casual Employment             | <p>Casual employees are not permanent employees and normally work less than full-time hours as prescribed by the applicable industrial instrument. Casual employment attracts the payment of a loading (as prescribed by the applicable industrial instrument) in lieu of sick and recreation leave.</p> <p>Casual employment is characterised by its ad hoc nature with each engagement standing alone. However, because of historical factors there are instances where employees have been employed as casuals on a regular and systematic basis over a long period of time. This is normally not within the strict definition of the term and many such employees should be properly classified as temporaries or part-timers.</p> <p>The difference between casual employment and temporary employment is that casual employment attracts the loading in lieu of sick and recreation leave whereas temporaries will generally receive the same entitlements as full-time employees.</p>                                                                                                                                                                                                                                                                                                                                                                                                        |
