

# Desk areas

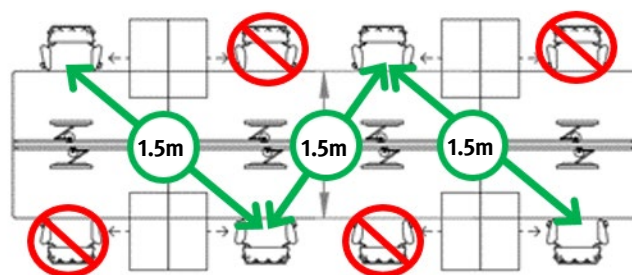

**Opposite** or **diagonal** seating configuration will ensure there is 1.5m between workers.

Opposite seating

**Most desks are a minimum 750mm deep**, with a dividing screen of 50mm, which will meet the minimum 1.5m distance in an opposite seating configuration.

Diagonal seating

If your desks are **less than 750mm deep**, then adopt the diagonal seating configuration to maintain the 1.5m distance.
